Alphamalt, Powerzym, Pastazym, Tigerzym,
Compozym, Omnizym

Flour treatment specialist MC Mühlenchemie was founded in 1923 in Frankfurt. Since 1990 it has been part of the Stern-Wywiol Gruppe. As a world leader in flour treatment, MC Mühlenchemie provides custom solutions for the standardization, improvement, and enrichment of flour, the staple food. The company processes over 150 million tonnes of wheat every year and counts over 2000 mills in over 150 countries as its customers. At the "Futuremaker" SternTechnology Center in Ahrensburg, Germany and at twelve technology and production locations worldwide, dedicated teams of specialists offer individual solutions for optimum flour quality, to meet the current requirements of local mills. In its 100-year history MC Mühlenchemie has developed pioneering solutions in enzyme technology. Among its most familiar products are Alphamalt, Powerzym, Pastazym, Tigerzym, Compozym, and Omnizym. These innovations have made the company an industry pioneer.
